

Nedo® Product Information

Nedo mEasure-fix Vehicle Safety Tool

Nedo Vehicle Safety Tool is a new and innovative measuring device to quickly decide whether a vehicle meets all width and height restrictions of your car wash. Be sure that all vehicles in question go safely through your car wash.

Benefits:

- Safety for your customers
- Safety for your crew
- Safety for vehicles

Use the new Nedo Vehicle Safety Tool with every vehicle where you question whether it can go safely through your car wash due to its height or width.

Measure the height at the highest point of the vehicle.

The cushion of the horizontal arm helps to prevent scratches.

Measure the width. The rubber wheel allows to easily position the Vehicle Safety Tool.

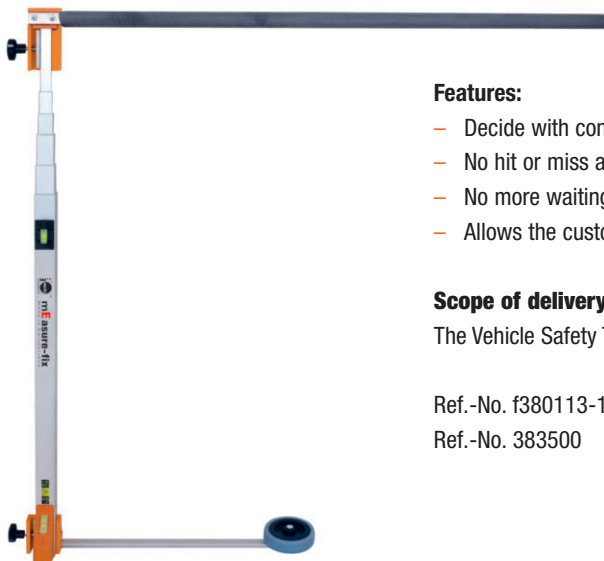

Measure from the inside of the driver's side tire to the outside at the passenger's side.

Be sure the vehicle meets the width restrictions and does not exceed the conveyor.

Read off the measured dimensions from the analog display and decide quickly whether the vehicle meets your height and width restrictions.

Features:

- Decide with confidence whether a vehicle will go safely through your car wash
- No hit or miss at the clearance bar
- No more waiting until the vehicle in question gets to the conveyor to decide
- Allows the customers to see their measurement

Scope of delivery

The Vehicle Safety Tool consists of 2 components:

Ref.-No. f380113-185

Ref.-No. 383500

Nedo mEasure-fix , telescopic measuring stick with built-in measuring tape
