

Nedo® Product Information

Nedo Telemeter

The Nedo Telemeter is a practical all-purpose measuring rod for interior and exterior use. It can be used in building work, interior outfitting and the construction of exhibition stands and work on scaffolding.

The 1 m extending sections run between abrasion-resistant plastic guides which also serve as wiper blades. By means of practical pushbuttons, the Nedo Telemeter can be reliably locked, thus preventing the telescopic elements from being retracted unintentionally.

The Nedo Telemeter conforms to accuracy class III $\Delta l = 0,6 + 0,4 \cdot L(m)$.

Nedo Telemeter

Ref.-No.	Mesuring range	Length retracted	Graduation	Weight	Incl. case
F 575 313	1.12 to 5.00 m	1.12 m	mm	1.15 kg	no
